

# Online **MSc in Digital Health**

Start your career in digital healthcare

# Programme Overview

CCH has been providing professionals across the globe with innovative **online postgraduate courses** in the field of healthcare since its inception. We are therefore delighted to announce our collaboration with the University of Central Lancashire (UCLan) School of Medicine to release an **MSc/PGDiploma/PGCertificate in Digital Health**.

Our aim is to equip you with the knowledge and skills to capitalise on the rapid **advance in digital healthcare technologies** that will improve the delivery of healthcare in the UK and across the

globe. Digital technologies have already revolutionised many aspects of our lives and will undoubtedly enhance the **efficiency of healthcare delivery** and make medicine more personalised and precise.

Digital health is therefore an exciting area of study, with **new developments and opportunities** evolving rapidly.

## Healthcare systems across the globe are going digital

Within 20 years, 90% of all jobs in the NHS will require digital skills (Topol Review NHS, 2019)

## Harness the power of digital health technology now

As digital disruption rapidly transforms our health systems, there's a high demand for professionals with skills in both technology and healthcare

## Graduate with the skills needed to start your career

Future-proof your career in digital healthcare with an MSc in Digital Health

# Programme **Benefits**

You will join this course at a time of fast-paced change in the NHS and in digital healthcare developments. The course team bring a wealth of experience, knowledge, networks and above all, passion, to their teaching.

The online MSc in Digital Health will equip you with the knowledge and skills to:

## **Deliver healthcare throughout the community**

Particularly to disadvantaged, remote and rural patients, in a way that minimises risk whilst maximising access

## **Capitalise on digital health technologies**

## **Increase employment opportunities**

## Enhance Your **Career**

The global market for digital health is expected to exceed £400 billion by 2025. There is a great need for a digital health-ready workforce. It is now increasingly important that doctors and other healthcare professionals are able to exploit digital opportunities in healthcare to:

- **Improve patient outcomes**
- **Deliver safe care more efficiently and effectively**
- **Bridge the gaps between different teams within health and social care**

The NHS urgently needs professionals with digital expertise. Our online postgraduate programmes enable doctors and healthcare professionals to deepen their knowledge on digital health technologies to deliver exemplary healthcare.
